Future of AI in Manufacturing

About AICTE-VAANI :

The All India Council for Technical Education (AICTE) has launched flagship AICTE-VAANI (Vibrant Advocacy for Advancement and Nurturing of Indian Languages) scheme, reaffirming its commitment to promoting Indian languages in technical education. AICTE-VAANI aims to strengthen the teaching-learning process by encouraging faculty members and students to engage with technical concepts in their native languages. This initiative facilitates the development of comprehensive knowledge repositories in local languages, making cutting edge technical information more accessible across diverse linguistic communities. By supporting the creation of technical

content that incorporates recent innovations and developments in regional languages, VAANI helps bridge language barriers in technical education.

Objectives of the Workshop:

- 1: To make the participants aware of the changing scenario in the area of Industrial revolution starting with steam power(1.0), electricity (2.0), computing(3.0) and finally the era of Smart systems involving AI and IoT.
- 2: Give the participants a view of the emerging paradigm of Industry 5.0 which aims to create a harmonious interaction between human and machines thus shifting focus from pure technology to a constructive synergy of man and machine.
- 3: To demonstrate the implementation of technology with human to bring out efficient production and manufacturing processes to reduce cost and enhance customer satisfaction.
